Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

The abstract of the disclosure is objected to because it is not a single paragraph.

Correction is required. See MPEP § 608.01(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fleury et al in view of Hansen et al.

Fleury et al disclose a method of preparing a calcium fortified yogurt comprising using a calcium phosphate in powder form having a mean diameter of less than 150 μm (see entire document).

The claims differ as to the addition of the calcium phosphate prior to inoculation.

Hansen et al disclose a process for preparing a fortified yogurt comprising the addition of calcium prior to inoculation (see entire patent, especially claim 1).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to add calcium phosphate prior to inoculation as taught by Hansen et al in that of Fleury et al because the addition of calcium phosphate both before and after inoculation is conventional in the art.

In the absence of unexpected results, it is not seen how the claimed invention differs from the teachings of the prior art. Applicant's claims are drawn to a combination of known

components which produces expected results, see In re Kerkhoven 205 USPQ 1069 and In re Gershon 152 USPQ 602.

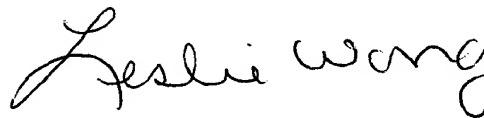

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability. No claim is allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
